Volume contents

M.A. Riedinger, M. Steinitz-Kannan, W.M. Last & M. Brenner: A ~6100 ^{14}C yr record of El Niño activity from the Galápagos Islands 1–7
I.R. Smith: Diatom-based Holocene paleoenvironmental records from continental sites on northeastern Ellesmere Island, high Arctic, Canada 9–28
J. Miettinen, E. Grönlund, H. Simola & P. Huttunen: Palaeolimnology of Lake Pieni-Kuuppalanlampi (Kurkijoki, Karelian Republic, Russia): isolation history, lake ecosystem development and long-term agricultural impact 29–44
F. Sylvestre: A high-resolution diatom reconstruction between 21,000 and 17,000 ^{14}C yr BP from the southern Bolivian Altiplano (18–23°S) 45–57
D.F. Porinchu & L.C. Cwynar: Late-Quaternary history of midge communities and climate from a tundra site near the lower Lena River, Northeast Siberia 59–69
B.C. Shumate, C.L. Schelske, T.L. Crisman & W.F. Kenney: Response of the cladoceran community to trophic state change in Lake Apopka, Florida 71–77
S.S. Dixit, A.S. Dixit & J.P. Smol: Diatom and chrysophyte transfer functions and inferences of post-industrial acidification and recent recovery trends in Killarney lakes (Ontario, Canada) 79–96
C. Bigler & R.I. Hall: Diatoms as indicators of climatic and limnological change in Swedish Lapland: a 100-lake calibration set and its validation for paleoecological reconstructions 97–115
M.F. Rosenmeier, D.A. Hodell, M. Brenner, J.H. Curtis, J.B. Martin, F.S. Anselmetti, D. Ariztegui & T.P. Guilderson: Influence of vegetation change on watershed hydrology: implications for paleoclimatic interpretation of lacustrine δ^{18}O records 117–131
E. Jeppesen, J.P. Jensen, S. Amsinck, F. Landkildehus, T. Lauridsen & S.F. Mitchell: Reconstructing the historical changes in *Daphnia* mean size and planktivorous fish abundance in lakes from the size of *Daphnia* ephippia in the sediment 133–143

Note
C.M. Lane & K.H. Taffs: The LOG corer – a new device for obtaining short cores in soft lacustrine sediments 145–150

M. Enache & Y.T. Prairie: WA-PLS diatom-based pH, TP and DOC inference models from 42 lakes in the Abitibi clay belt area (Quebec, Canada) 151–171
M.R. Murray: Is laser particle size determination possible for carbonate-rich lake sediments? 173–183
M.R. Palacios-Fest, A.L. Carreño, J.R. Ortega-Ramírez & G. Alvarado-Valdéz: A paleo-environmental reconstruction of Laguna Babícora, Chihuahua, Mexico based on ostracode paleoecology and trace element shell chemistry 185–206
S. Stanley & P. De Deckker: A Holocene record of allochthonous, aeolian mineral grains in an Australian alpine lake; implications for the history of climate change in southeastern Australia 207–219
P. Freytet & E.P. Verrecchia: Lacustrine and palustrine carbonate petrography: an overview 221–237
F. Dapples, A.F. Lotter, J.F.N. van Leeuwen, W.O. van der Knaap, S. Dimitriadis & D. Oswald: Paleolimnological evidence for increased landslide activity due to forest clearing and land-use since 3600 cal BP in the western Swiss Alps 239–248
R. Quinlan & J.P. Smol: Regional assessment of long-term hypolimnetic oxygen changes in Ontario (Canada) shield lakes using subfossil chironomids 249–260
T. Kauppila, T. Moisio & V.-P. Salonen: A diatom-based inference model for autumn epilimnetic total phosphorus concentration and its application to a presently eutrophic boreal lake 261–273

Notes
O. Bennike & P. Wiberg-Larsen: Seed-like hydroptilid larval cases (Insecta: Trichoptera) from Holocene freshwater deposits 275–278
B.D. Beierle, S.F. Lamoureux, J.M.H. Cockburn & I. Spooner: A new method for visualizing sediment particle size distributions 279–283

Book review 285–286

W. Dean, R. Anderson, J. Platt Bradbury & D. Anderson: A 1500-year record of climatic and environmental change in Elk Lake, Minnesota I: varve thickness and gray-scale density 287–299
W. Dean: A 1500-year record of climatic and environmental change in Elk Lake, Clearwater County, Minnesota II: geochemistry, mineralogy, and stable isotopes 301–319
J. Platt Bradbury, B. Cumming & K. Laird: A 1500-year record of climatic and environmental change in Elk Lake, Minnesota III: measures of past primary productivity 321–340
M.B. Bush, M.C. Miller, P.E. De Oliveira & P.A. Colinvaux: Orbital forcing signal in sediments of two Amazonian lakes 341–352
K. Ponader, R. Pienitz, W. Vincent & K. Gajewski: Limnological conditions in a subarctic lake (northern Québec, Canada) during the late Holocene: analyses based on fossil diatoms 353–366
W.F. Kenney, M.N. Waters, C.L. Schelske & M. Brenner: Sediment records of phosphorus-driven shifts to phytoplankton dominance in shallow Florida lakes 367–377
A.M. Paterson, B.F. Cumming, S.S. Dixit & J.P. Smol: The importance of model choice on pH inferences from scaled chrysophyte assemblages in North America 379–391

M. Prebble, M. Schallenberg, J. Carter & J. Shulmeister: An analysis of phytolith assemblages for the quantitative reconstruction of late Quaternary environments of the Lower Taieri Plain, Otago, South Island, New Zealand I. Modern assemblages and transfer functions 393–413
M. Prebble & J. Shulmeister: An analysis of phytolith assemblages for the quantitative reconstruction of late Quaternary environments of the Lower Taieri Plain, Otago, South Island, New Zealand II. Paleoenvironmental reconstruction 415–427
M. Vermoere, T. Van Thuyne, S. Six, L. Vanhecke, M. Waelkens, E. Paulissen & E. Smets: Late Holocene local vegetation dynamics in the marsh of Gravgaz (Southwest Turkey) 429–451
A. Muñoz, J. Ojeda & B. Sánchez-Valverde: Sunspot-like and ENSO/NAO-like periodicities in lacustrine laminated sediments of the Pliocene Villarroya Basin (La Rioja, Spain) 453–463
A. Philibert & Y.T. Prairie: Diatom-based transfer functions for western Quebec lakes (Abitibi and Haute Mauricie): the possible role of epilimnetic CO_2 concentration in influencing diatom assemblages 465–480
V.A. Reid, G.R. Carvalho, D.G. George & H.I. Griffiths: A technique for the molecular genetic analysis of *Daphnia* resting eggs from sub-recent lake sediments 481–486
D. L. Dettman, M. Palacios-Fest & A.S. Cohen: Comment on G. Wansard & F. Mezquita, The response of ostracode shell chemistry to seasonal change in a Mediterranean freshwater spring environment 487–491

Volume contents 493–494
